

21 Number Game

Game

team Members

Suryansh Pratap
Singh

Reshu Devi

Yashi Gupta

Sriddha Dhiman

Instructions

- 1 the player can choose to start first or second.
- 2 the list of numbers is shown before the Player takes his turn so that it becomes convenient.
- 3 If consecutive numbers are not given in input then the player is automatically disqualified.
- 4 the player loses if he gets the chance to call 21 and wins otherwise.

some Suggestion

Winning against the computer can be possible by choosing to play second. The strategy is to call numbers till the multiple of 4 which would eventually lead to 21 on computer hence making the player the winner.

Are you ready to win?
